### Spy Bugs Wireless Wifi Transmitter Signal Detector

2019/09/30

Spy Bugs Wireless wifi transmitter signal detector Adjustable Threshold 160g Light Weight VS318 Super detector Instruction VS318 adopt the advance technology of germany, is used for kinds of Bug , car tracker , Wireless pinhole camera , Mobile phone undercover software , instrument for casino scam and so on . The function can meet Military survedillance , It can detect Eletrical source , so will prevent you and your family from the damage of Eletromagnetic radiation. It adopts digital receiving model, the difference from other detectors , one is widen the detection frequency domain , avoid the disturbance from clutter signal of life . second is improved the sensitivity , the advantage is that no matter how strong signal transmitting , can easily locate it by adjusting knob . So it is the most advanced portable wireless signal detection equipment . The normal wireless detector can not detect CDMA siganl , if you dial it via China Telecom , the normal detector never alarm , because CDMA mobile phone agreement was invented by the U.S. Military , it is a radio frequency hopping technology , was called code division multiple access , it is hard to detect , the reason is the small of transmitted power . So G318 is the can accurately indentify the CDMA mobile communication protocol of monitoring equipment. Panel & function Equipment is for handheld , Top left is for the antenna , the middle is changing DC port , right is the sensitivity adjustment knob . the light will out when full of charge . The second is for power switch indicator , will extinguish when power is not enough . The third to tenth is for Detection instructions , a signal from weak to strong , if a lights flash , will produce “ beep ” sound , the sound is more urgent , the signal is more strong . on the right the round button is power switch . Instructions

- Turn switch on ( button up ) , second led lights , means power to work normally . Turn the knob clockwise to the largest , enter standby mode . If receiving stronger environmental signal , then adjust the rotary knob back , the light falsh not more than the fifth light .
- signal is full , sound will be more rapid .
- when light bars are full and bright , the sound is more rapid , means it is near to the target . If we adjust the

rotary knob back when the signal is strong , so it is easy to find the target object . ● Due to high sensitivity, so we can receive the signal from Mobile phone base stations, television broadcasting station on the road . If you want to find car GPS , pls drive it to the place with weak signal , also pls set the equipment of communication as airplane mode , then the detector can work . If there is no target in the room , but the detector will alarm at times, the possible will be . 1) Your own communication equipment will match code with base station in timing and automatic. 2) the target is near to the room , maybe in another room , or somebody called in another room . 3) Too close with the wireless router.
